Certified

Corporation

Our mission is to design kind, clever places to help people learn and grow.

We're ready to help you ...

Make your nursery spaces represent and reflect your identity and values.

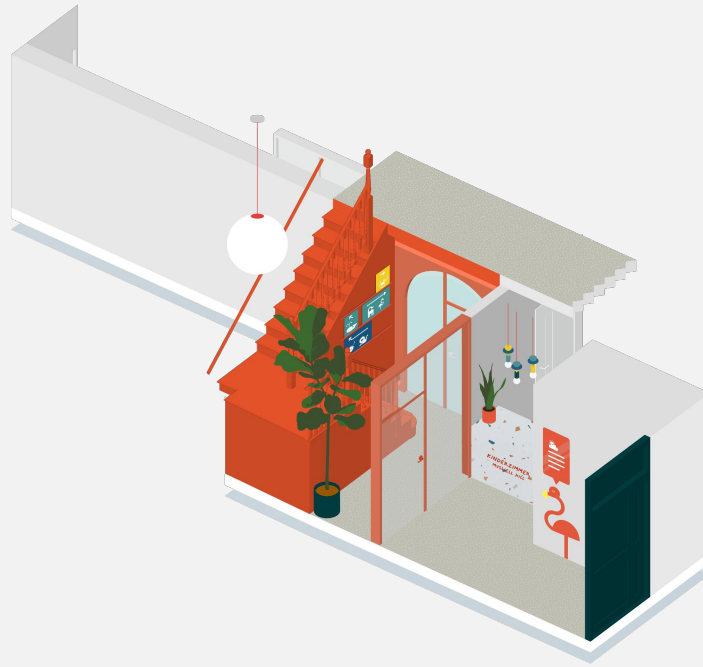

Quickly evaluate a potential site, and identify its opportunities and risks.

Ensure the launch of each new site is streamlined, efficient and pain-free.

Stay true to your mission as you grow.

Meet your design team

We are architects, designers, technicians and storytellers uniquely positioned to help early-years brands that are looking to scale.

We work hand-in-hand with clients and their school communities.

Our vision is a world where the design of every school sparks courage, compassion and curiosity in children, teachers and parents.

Our ethos

We're creative, collaborative designers who believe great outcomes arise from a deep understanding of the people and businesses we're designing for.

In 2019 we became the UK's first B Corp architecture studio, committing to balance people, planet and profit in all we do.

We believe a strong culture is the key to great work and lasting relationships. Ours is based upon the **four key values** at the heart of everything we do.

Empathy

Put yourself in the other's shoes.
Be open, inclusive, and approachable.

Tenacity

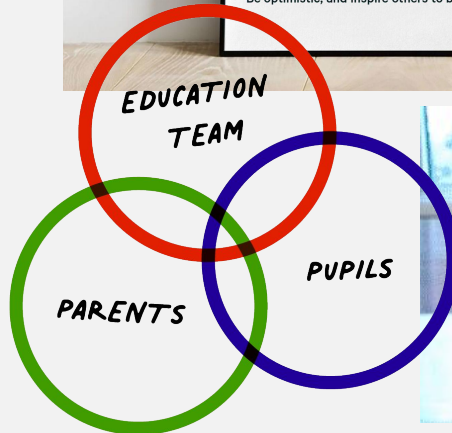

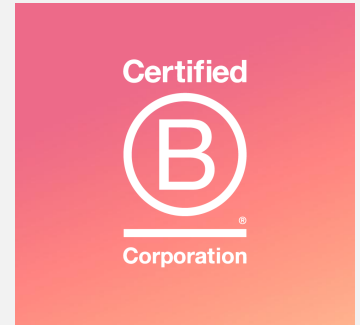

Bring engagement, energy and intensity.
Focus relentlessly until the task is complete.

Questioning

Be explorative and question assumptions.
Focus on the Why.

Spark

Create memorable experiences.
Be optimistic, and inspire others to be courageous.

What we're working on right now...

We work across a range of scales, from new-build schools to retrofit projects.

To see a wider selection of our work, visit our [projects page](#).

Southgate Road School

A low-carbon, new-build school on a constrained backland site in East London.

N Family Club Nurseries

Helping a start-up establish their design identity and strategy to grow from one to 30 sites and be awarded best UK group operator by Nursery World.

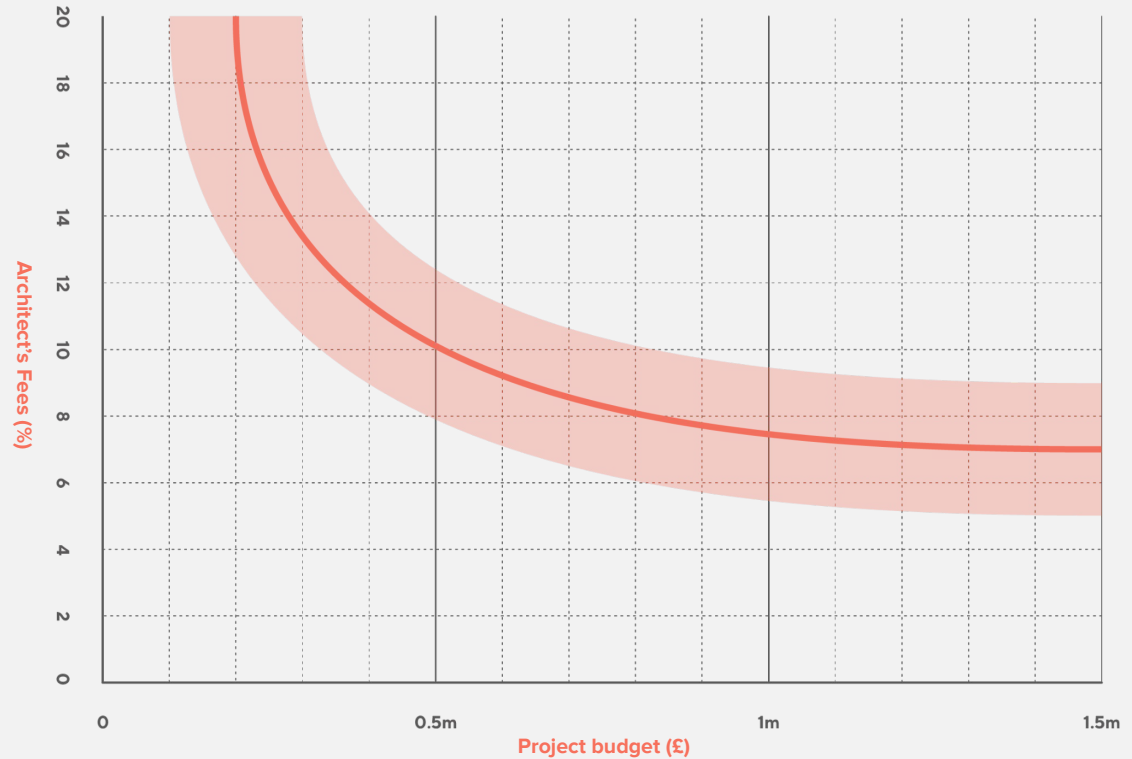

Kinderzimmer Nursery Group

Helping a leading German early-years brand to build their identity, launch and scale in the UK market.

How much will it cost?

Use our simple graph to estimate how much you should set aside to work with an architect.

The final fee will depend on the project scope and service level you need, which we can define together on an initial scoping call.

How long will it take?

We split projects up into three distinct phases as illustrated here.

The length of each phase is dependent on various factors, so speak with us to get a tailored fee and timeline for your project.

1

Concept Design Phase

4–6 weeks

We help you to explore, test and communicate different design ideas for your nursery.

2

Technical Design Phase

6–8 weeks

We prepare drawings and documents for planning consent, building regulations and construction.

3

Delivery Phase

12+ weeks

We help you find and appoint a contractor, and we can then act as project managers during the build.

Thanks for reading...

Let's work together.

Unit B3.2, Yellow Stairs, Bussey Building
Peckham, London SE15 3SN

★★★★★

For a group of franchise CEOs who rarely have the opportunity to come together, we were a hard group to please. Tom and the team exceeded all expectations.

Emily Vermont
School of Social Entrepreneurs

★★★★★

We found Chris, Tom and the team to be full of ideas, keep well to the brief, respond to critique constructively and fit well with our way of thinking.

Vicky Garner
Living Villages Cook School

★★★★★

I would recommend them to other clients looking for a practice who can apply fresh thinking and dedication to a project.

Neil Kirby
Head of Regeneration, Southwark
